

Press Release

SCSC obtained the certificate of IATA CEIV-Pharma

Oct 22nd, 2019, Ho Chi Minh City

We are proud of announcing, that SCSC Cool Center has successfully passed the IATA CEIV Pharma Audit Program then received the valued certificate in October 2019, and being the first air cargo terminal obtained IATA CEIV Pharma Certificate in Vietnam.

SCSC began the certification process in 2018 with complex requirements of training internal and external, reviewing of procedures for handling temperature-controlled Life Science & Healthcare shipments, and an extensive assessment of these complex processes by two separate independent validators.

CEIV Pharma refers to “The Center of Excellence for Independent Validators in Pharmaceutical Logistics” created by IATA to help organizations and the entire air cargo supply chain to get on the right track to achieve pharmaceutical handling excellence. It addresses industry’s need for more safety, security, compliance and efficiency, by the creation of a globally consistent and recognized pharmaceutical product handling certification.

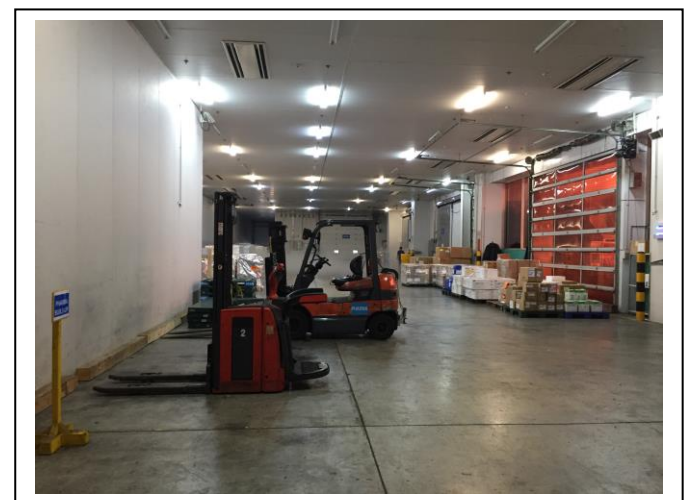

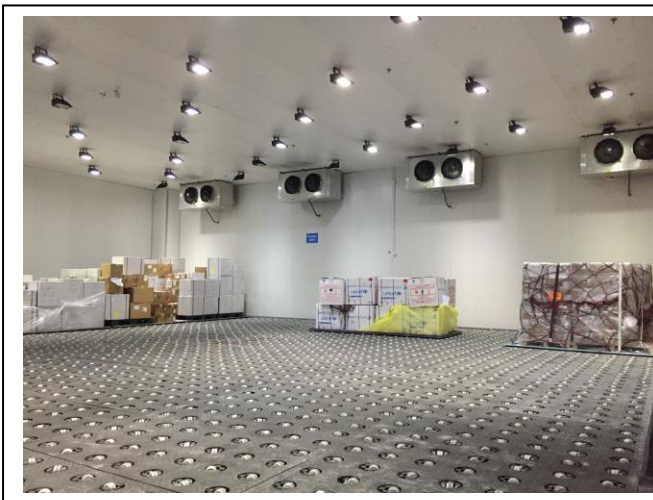

Ground Handling Council Member

SCSC Cool Center is fully complied with all applicable pharmaceutical standards expected from pharmaceutical manufacturers and distributors, and airlines, agents as well in terms of facilities, equipment, operations and staff qualified.

CEIV Pharma will further enhance our existing standards to the higher level. SCSC would like to urge all cargo businesses such as Airlines, Ramp Handler, Cool Truckers etc. to join this movement towards uniformity, which will create higher service standards for pharmaceutical handling in the industry in Vietnam as well.
